

## DETECTABLE KEY CHAIN

Made of detectable plastic, its use is especially suitable for the food, pharmaceutical and chemical industries. It can be used at any production process stage, equipped with metal detectors or X-rays.

Ideal for identifying objects such as keys, boxes, shovels, etc. It incorporates a second hole for a larger diameter for clamping.

Laser engraving, lettering, adhesive label or screen printing customized. (Logo, numbering).

*We confirm this product fulfill the requirements on materials used for food contact as described in EU 1935/2004, 2023/2006, 10/2011 and FDA 21.*

“ **MADE OF DETECTABLE PLASTIC** (METAL DETECTORS AND XR EQUIPMENT) ”
