

Metal Detectable and Visible to X-Ray

PEN

Our pens are the most detectable on the market. The mixture of compounds in the pen is evenly distributed ensuring optimal detection.

With a high writing quality, an ergonomic and non-slip design and a great endurance. They are suitable for the food, pharmaceutical and chemical industries thanks to their composition, with the least number of divisible parts.

They are available in different colors of ink and casing. They can also be engraved and customized.

Housing Color: 
Ink Color: 

Polypropylene of the housing and mechanism complies with the EU 1935/2004, 2023/2006, 10/2011 and FDA 21 standards. The mine complies with the CE 1907/2006 (REACH), EU 1272/2008, SVHC, TSCA and ISO regulations 12757-1.

MADE OF DETECTABLE PLASTIC (X-RAY AND METAL DETECTORS)

TECHNICAL SPECIFICATIONS

(based on the QU0010 model)

Length	145 mm
Width	13 mm
Weight	11,98 g
Grade of Flammability	UL 94 HB
Housing + mechanism: material	Polypropylene
Housing + mechanism: colors	Blue, red, gray and green
Mine: ink type	Standard
Mine: body material	Stainless steel
Ink: colors	Blue, black red and green
Quantity per box	50 units

SPECIAL INKS

Pressurized ink: pressurized charge to 3000hPa, that allows writing on any surface and position, suitable for use in areas with temperatures down to -20 ° C or extremely wet (even under water).

EasyFlow ink: Excellent fluidity, suitable for use at temperatures down to -20 ° C. Used usually in freezers and refrigerators.

Pressurized Ink

EasyFlow Ink

*Version without clip available for both references.

RECOMMENDATIONS

Store in a cool and dry place, protected from sunlight. Do not expose to temperatures higher than 60 ° C.

It is advisable not to carry exposed pen tips in pockets.

*Include hole for ring.
