

HIGHLIGHTER MARKER

Our detectable highlighter marker is made of detectable plastic.

It is suitable for use in the food, pharmaceutical and chemical industry due to its minimal composition of parts.

It is available in the following ink colours: yellow, green, blue, orange and pink.

It can also be engraved and customised.

Polypropylene of the housing complies with the EU 1935/2004, 2023/2006, 10/2011 and FDA 21 standards.

MADE OF DETECTABLE PLASTIC (X-RAY AND METAL DETECTORS)

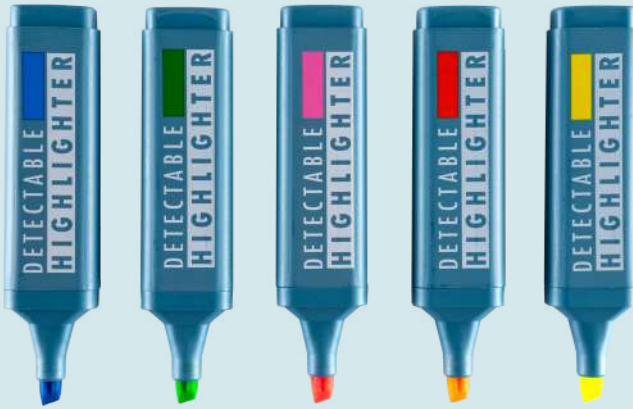

FEATURES

Anti-Dry-Out technology "CAP OFF 72h": the highlighter can be uncovered 72 hours without drying.

Ideal for highlighting text in lines of different thicknesses.

Strong build quality; less risk of breakage.

TECHNICAL SPECIFICATIONS
