

WHITEBOARD MARKER

Our detectable whiteboard marker is made of high impact resistant detectable plastic (cap and body).

It is suitable for use in the food, pharmaceutical and chemical industry due to its minimal composition parts.

It has got double click safety cap.

It is available in the following ink colours: black, blue, red and green. Sold in packs of 5 units (same colour).

Polypropylene of the housing (cap and body) complies with the EU 1935/2004, 2023/2006, 10/2011 and FDA 21 standards.

MADE OF DETECTABLE PLASTIC (X-RAY AND METAL DETECTORS)

FEATURES

Anti-Dry-Out technology "CAP OFF 72h": the marker can be uncovered 72 hours without drying.

Higher load capacity: 30% longer writing durability.

Surface: Writing on very low porosity surfaces such as whiteboard, crystal, glass.

TECHNICAL SPECIFICATIONS

Length	132 mm
Width	15 mm
Weight	19,05 g
Tip thickness	2-3 mm
Tip type	Bullet
Material	Polypropylene
